DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following is required under 35 U.S.C. 121.
2. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-18, drawn to creating page elements and transforming page elements utilizing a transformation table, classified in 715/523.

Group II, claims 19-104, drawn to a web interface for a database, classified in 707/3.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the specific manner of mapping the page elements as claimed in group I, to transform information from one particular format into a different format as claimed in group II is not required by the group II. The subcombination has separate utility such as the page elements, which could be used with an XSLT processor.
